Source: Urban Institute analysis of data from the American FactFinder, American Community Survey, 2008.

Note: Public coverage is defined as having coverage from Medicare, Medicaid, or any government assistance plan for low-income or disabled individuals, and VA. Private coverage is defined as employer/union provided, directly purchased, and TRICARE/military. Health insurance coverage types are not mutually exclusive. Coverage rates will not sum to 100%.

Note: All rates listed here are statistically different from the 'Top 100 Metropolitan Areas Pooled' percentage at the .10 level.

Note: Metropolitan Statistical Areas are ranked from lowest to highest rate for all coverage types.
